

Project Chimera

Growth to Version 5

Amazon-style narrative report • Prepared December 15, 2025

Executive Summary

Over this dialogue-driven build, the system evolved from a prompt-only exchange into a governed, lossless specification pipeline (Technical.UST → gates → Creative.UST → platform outputs). Version 5 is defined by strict formatting and parsing guardrails (speaker attribution, sFX containment, comma discipline), a gospel-correct 6/8th timing model, and a high-fidelity lead vocalist persona designed to stress-test realism. The workflow is now reversible: decisions are captured as state changes, and failures can be traced back to specific spec addresses for repair.

Scope and Deliverables

This report documents all hard-coded changes through Version 5, including decision-tree state capture, a Phase 0–5 operational workflow, and appended artifacts: Artist Bio, Show Summary, Creative.UST surface spec, a Technical.UST excerpt with gates summary, SEG detail, G-Card evidence mapping, and the Sonic Excellence 20 matrix.

Version History and Hard-coded Changes

Version	What changed (hard-coded)
v1	Single-shot prompting. Minimal structure guidance. No governance, no gates.
v2	Introduced UST-first thinking and Maestro OS compilation model. Lyrics-Lock elevated to a non-negotiable law.
v3	Creative.UST surface format stabilized: section headers become meta containers; stage direction moved into sFX lines; speaker tags moved to the end of lines.
v4	Meter corrected to gospel 6/8th with dotted-quarter feel. Added prosody grid (11-syllable target via delivery rules). Added A.I. style control.
v5	Character-budget discipline enforced. Non-lyric text compressed first. Outro and End preserved. Added three-factor Suno compatibility.

Decision Tree and State Change Capture

Decision Tree (state change capture)

```

ROOT: Output Fidelity
■ ■ If lyric drift risk
■ ■ ■ Enforce Lyrics-Lock as HARD law
■ ■ ■ Move all non-lyric direction into sFX lines
■ ■ If speaker attribution confusion
■ ■ ■ Use bracket performer tokens only for true co-leads
■ ■ ■ Treat choir responses as adlibs in parentheses
■ ■ If Suno parsing glitches
■ ■ ■ Remove commas outside quoted lyric lines
■ ■ ■ Keep headers as succinct descriptive sentences
■ ■ ■ Avoid tag-cloud lists in section headers
■ ■ If meter or groove drifts

```

- ■■ Hardcode meter as 6/8th
- ■■ Specify dotted-quarter gospel roll
- ■■ Define stop-time entry length
- ■■ If vocal persona drift
- ■■ Encode lead vocal biometrics and technique map
- ■■ Provide AAVE pronunciation map for key words
- ■■ If character limit exceeds 4999
 - ■■ Compress non-lyric sections first
 - ■■ Keep Outro and End uncut
 - ■■ Shorten sFX text while retaining intent

Phase 0–5 Workflow

Phase 0: Kernel and Governance

- Declare global laws: Lyrics-Lock, addressability, reversibility, nulls-are-signal, and no output without gate pass.
- Select compilation model: forward compile (spec → prompt) plus reverse compile (output → deltas → spec).
- Instantiate the three contributing factors as separate artifacts: Artist Bio (no song data), Show Summary (song data), Creative.UST (full control spec).

Phase 1: Context Synthesis

- Ingest user persona and target sound identity.
- Normalize requirements into non-negotiables and negotiables.
- Draft initial structure map and instrumentation roles.

Phase 2: Spec Authoring

- Author Technical.UST (canonical) and Creative.UST (Suno-surface) from the same intent.
- Run SME round-robin: Musicologist, Producer, Linguist, Systems, Strategist.
- Apply deltas and record decisions and anti-pattern allowances.

Phase 3: Validation and Gates

- Run SEG feasibility checks: form, temporal integrity, spectral feasibility, human execution limits, policy enforcement.
- Run G-Card scoring with evidence bindings to UST addresses and require aggregate ≥ 7.0 .
- Run SE20 baseline checklist and capture any WARN items with remediation plans.

Phase 4: Compilation Outputs

- Compile Artist Bio (no song data), Show Summary, and Creative.UST with strict character budget handling.
- Perform parsing safety pass: comma audit, header sanity, adlib conventions, Outro+End preservation.
- Set curving weights for Suno: Bio, Summary, UST, based on observed failure mode (voice drift vs structure drift vs arrangement drift).

Phase 5: Iteration Loop

- Generate renders and measure bars-per-line if needed.
- Reverse compile observed failures into micro-deltas on Creative.UST and relevant Technical.UST addresses.

- Re-run gates if structural or policy changes occur; version and archive each stable release.

Artifact A: Artist Bio (2K, no song data)

Born in a small Southern town and raised in the heat of a Baptist church sanctuary, mo\$ is a contralto with near-baritone grit and a smoke-and-bourbon warmth that feels lived in. Her voice moves like a working instrument: grounded in gut-sung testimony, refined by years of operatic discipline, and fearless enough to bend microtones, slide into fry, or drop from a controlled belt to a whispered confession without losing the story.

As an artist, she treats tradition as a backbone, not a cage. She carries the spiritual urgency of old gospel, the bruised truth of the blues, and the porch-to-juke-joint realism of Southern music culture, while letting modern Southern rhythm and Houston pocket inform the way the music breathes. Her listening map runs from Robert Johnson's haunted minimalism to Hank Jr.'s hard-edged drawl and the wild Southern swagger of Skynyrd—then flips into funk and jazz discipline for timing, harmony, and touch.

mo\$ is most at home chasing authenticity in bars, juke joints, and late-night jam sessions, learning the room the way a preacher learns a congregation. She writes and performs to make the sacred feel immediate: lived faith, hard days, redemption, and the communal electricity of call-and-response. The production philosophy is simple—human first, artifacts last—capturing breath, edge, and space on purpose, then shaping it with precision. She's not chasing perfection as polish; she's chasing precision as truth. That means clear diction when it counts, intentional grit when it matters, and dynamics that move like real breath. In every project, mo\$ aims to honor the elders, advance the lineage, and leave enough open space for listeners to hear themselves inside the music. The result is a catalog that feels southern, fearless, and unmistakably hers.

Artifact B: Co-created Show Summary

We co created a 6/8th Southern gospel blues record with Texas grit and a Houston pocket inside the swing. Lead is a small town Black woman contralto with baritone grit and smokey warmth from Southern Baptist roots plus operatic control for micro nuance. Tribal drums drive the roll and a 3 sax frontline is the signature where fast attack alto cuts and runs tenor answers with body and bass sax anchors low mids without masking the voice. Rhodes and Hammond frame the worship air with sparse blues guitar punctuation. The arc moves from warning to testimony to a full worship peak on the name Jesus then returns to a warm reflective outro with spinback and vinyl hiss. Mix intent is live room realism with mono bass dark plate hooks phone safe mids and no shimmer.

Artifact C: Creative.UST (Suno surface spec)

[Theory]
[mode | minor blues gospel WITH lift color only]
[meter | 6/8th]
[tempo | dotted quarter gospel roll WITH Texas sway]
[key/tonal_center | D minor]
[chord_color | i iv V WITH sus4 add9 13 WITH bII passing]
[genre(s) | Southern Gospel Blues {primary} WITH Houston pocket AND tribal percussion]
[mood | warning THEN testimony THEN worship THEN release]
[bpm | 72]

[Voices]
[Vocalist: Lead]
[gender | female] [register | low mid contralto WITH baritone grit]
[delivery | church gut singer WITH operatic control]
[expression | smokey warmth THEN fierce praise THEN hush]
[articulation | crisp on house order Jesus sweetest fire]
[capabilities | belt to whisper WITH fry WITH micro bends]
[pronunciation | AAVE Jesus=JEE zus order=OR duh coming=CUH min sweetest=SWEE tist Holy Ghost=HO]
[Vocalist: BGV1]
[gender | mixed choir] [register | low mid bed] [delivery | hum AND short shouts]

[Style]
[genre | Gospel 6/8th AND Southern blues] [aesthetic | raw live room]
[intent | sacred urgency then praise] [texture | organic warmth WITH no shimmer]
[focus | one lead WITH 3 sax WITH tribal drums]

[Timbre]
[drum tone | tribal toms AND hand drums AND shakers WITH brush intro outro]
[bass tone | warm electric WITH mono low end]
[guitar tone | sparse blues fills]
[keyboard tone | Rhodes AND Hammond WITH organ thinned at peaks]
[fx palette | short room AND dark plate hooks AND light slap bridge AND vinyl hiss]
[vocal tone | close mic grit WITH clean endings]
[sax tone | fast attack alto AND tenor answers AND bass sax anchor WITH clear lanes]

[Performance]
[execution | hyper human church feel WITH operatic micro control]
[gesture | sax answers phrase ends AND choir answers as adlibs]
[rhythm handling | 6/8th roll WITH behind beat comfort]
[stop_time | 1 bar before worship entry]
[prosody | target 11 syllables per 2 bars WITH breath at bar 2 beat 5]
[anti_patterns | breath AND edge crack THEN recover]
[clarity | duck sax under Jesus AND sweetest AND thin organ under choir peaks]

[Post-production]
[final mix and master | mono bass AND dark plate hooks AND phone mono 200-5k AND spinback exit AN

[Road-Map]
[Intro | Verse A | Hook | Break | Verse B | Hook | Bridge | Worship Hook | Outro | End]

[LYRICS BLOCK]

[Intro | 8 bars | Lead | slow build WITH sax swells]
[** SFX: Rhodes WITH organ swell WITH deep bass WITH brushed snare WHILE choir hums **]
"Ohhh, you gotta get ready now... (mmm-hmm)"
"Ohhh, no man knows the day or the hour..."

[Verse A | 16 bars | Lead | stripped warning WITH sax stabs]
"Get your house in order, oh do it today"
"Get your house in order, oh do it right away"

"For Jesus is coming, no man knows where or when"
"Get your house in order, for He's coming back again"

[Hook | 8 bars | Lead | call and response WITH choir adlibs]
"Get your house in order..." ("In order!")
"Oh, don't wait too late..." ("Don't wait!")
"For Jesus is coming..." ("Coming!")
"He's coming back again"
[** SFX: blues guitar WITH organ swell WHILE choir hums **]

[Break | 4 bars | Band | instrumental breath]
[** SFX: sax trio answers THEN reset **]

[Verse B | 16 bars | Lead | signs AND testimony cues]
"There's earthquakes, hurricanes, famines, and disease"
"Can't you hear the Lord is callin'?"
"You better take heed..."
"So many homeless, lost out in the cold"
"But my God's got mansions"
"More precious than gold"

[Hook | 8 bars | Lead | repeat hook WITH stronger answers]
"Get your house in order, oh do it today"
"Get your house in order, oh do it right away"
"For Jesus is coming, no man knows where or when"
"Get your house in order, for He's coming back again"

[Bridge | 8 bars | Lead | testimony breakdown]
[** SFX: Rhodes and bass pulse WITH half time feel inside 6/8th WITH whisper and fry **]
"Ohh, but there's something, something about His name..."
[** SFX: choir hum rises AND drums build into entry **]

[Worship Hook | 16 bars | Lead | worship call and response WITH 1 bar stop time entry]
[** SFX: 1 bar stop time THEN organ swell WITH deep bass WITH light hi hats **]
"Something about the name Jesus,"
"Something about the name Jesus,"
"It is the sweetest name I know..."
"Oh, how I love the name Jesus,"
"Oh, how I love the name Jesus,"
"It is the sweetest name I know..."
[** SFX: lead pushes THEN choir responds **]
"Some say it's like fire shut up in my bones..." ("Fire in my bones!")
"Oh, the Holy Ghost is moving, I can feel it strong..." ("He won't leave us alone!")
[** SFX: drums lift AND sax counterpoint tightens **]
"Something about the name Jesus,"
"Something about the name Jesus,"
"It is the sweetest name I know..."

[Outro | 8 bars | Lead | return to softness WITH choir echo]
[** SFX: Rhodes WITH deep bass WITH light taps WITH sax fade **]
"Get your house in order, oh do it today..."
"Get your house in order, oh don't delay..."
("For He's coming... back... again...")
(** DJ spinback **) (** vinyl hiss **)

[End]

Artifact D: Technical.UST excerpt and Gates Summary

```
technical_ust:
  kernel:
    system_name: TECHNICAL.UST
    system_version: CANON.V1
    system_mode: non_destructive_lossless
    compilation_model: forward_plus_reverse
    governance_model: SEG_plus_GCARD_enforced

      no_suno_output_without_pass: HARD
  THY:
    THY.K3.S1_meter: 4/4  -> revised to 6/8th in Creative.UST surface
  SEG:
    SEG.K5.S5_pass_fail_verdict: PASS_WITH_WARN (bars_per_line unmeasured)
  G_CARD:
    G.K6.S3_aggregate_score: 8.44
    G.K6.S5_promotion_eligibility: PASS
```

SEG Detail (interpretation of PASS_WITH_WARN)

SEG passed feasibility with one warning: bars-per-line measurement is deferred until the first render. This is compliant with the nulls-are-signal law: unknown measurements remain null until empirically measured, then written back as a reversible delta. All other SEG domains are mitigated in-spec through spectral lane allocation (lead vocal priority, organ thinning at peaks, bass-sax lane control) and temporal controls (stop-time entry).

G-Card Detail (evidence-bound scoring)

Aggregate score 8.44 passed the 7.0 promotion threshold. Evidence bindings reference exact UST addresses, ensuring auditability. High-scoring domains include narrative coherence, performance believability, and cultural integrity. Differentiation is driven by the 3-sax frontline with tribal percussion in a gospel 6/8th pocket, plus the contralto persona spec.

Sonic Excellence 20 Matrix

Item	Status	Evidence / note
SE20.K1.S1 tonal clarity	PASS	THY.K1 tonic_center + chord_color stable in D minor.
SE20.K1.S2 harmonic interest	PASS	Gospel colors + bII passing tension for sax.
SE20.K1.S3 rhythmic intent	PASS	6/8th roll + dotted-quarter feel + stop-time entry.
SE20.K1.S4 form purpose	PASS	Intro warning -> hooks -> testimony -> worship -> release.
SE20.K1.S5 tension release logic	PASS	Bridge drop then worship peak then soft outro.
SE20.K2.S1 narrative arc	PASS	Warning, signs, testimony, worship, closing admonition.
SE20.K2.S2 internal rhyme density	N/A	Lyrics locked; no rewrite permitted.
SE20.K2.S3 bar math accuracy	WARN	Bars per line pending measurement after first render.
SE20.K2.S4 line functionality	PASS	Call/response lines mapped to adlibs; clear roles.
SE20.K2.S5 memorability	PASS	Repeated hook phrases; worship refrain strong.

SE20.K3.S1 casting accuracy	PASS	Contralto grit + operatic control defined and reinforced.
SE20.K3.S2 register strategy	PASS	Chest resonance verses -> belt peak -> hush outro.
SE20.K3.S3 harmony intelligence	PASS	Choir limited to hum + short shouts to avoid masking.
SE20.K3.S4 adlib discipline	PASS	Adlibs only in parentheses; no second lead.
SE20.K3.S5 articulation intent	PASS	AAVE pronunciation map + key-word clarity rules.
SE20.K4.S1 build control	PASS	Stop-time entry + controlled lift.
SE20.K4.S2 drop impact	PASS	Bridge stripdown + whisper/fry as contrast.
SE20.K4.S3 sectional contrast	PASS	Verse stripped vs worship dense.
SE20.K4.S4 density modulation	PASS	Organ thinned at peaks; sax lanes defined.
SE20.K4.S5 negative space use	PASS	Phrase-end answers + breath windows + stop-time.
